

Introducing innovative, cut resistant garments custom made to suit your specific needs. Made with our latest technology... **HALO**

WHAT IS HALO TECHNOLOGY?

Halo is a highly adaptable platform that can deliver specific features for specific needs. Tell us what you need and we'll craft Halo protection that will let you put out top notch protective clothing that your competitors don't have.

WHAT MAKES HALO UNIQUE?

Complex, engineered, ultra-light weight composite yarn

- Stronger than steel and aramid (Kevlar®)
- Unaffected by moisture or UV radiation, unlike aramid
- Lightest weight and most comfortable cut resistant body wear available in the world today, to match your budget needs
- Zone cut protection A6 to A8. Extra protection in high-risk areas
- Keeps user cool and comfortable

Launderable

- Can be laundered multiple times with no degradation of cut resistance, lowering the effective long-term cost of ownership

Made In America

- 100% made in the USA
- No supply chain issues and short lead times
- Unique, patented technology
